ATSRND-108 Understand ATF logs

10 February 2025   14:00

- Understand what **information** the printer test logs (ATF) outputs have and how it is **formatted**.
1. What is the test entry point/ exit point?
   Entering working directory
    Start of module: excecute module
   Start of suite: Entering suite
   End of suite: suite <suitename>: passed/failed
   Start of test: Running test: <test_name>

   End of test: test outcome (passed/failed/skipped)

   Structure suite->Module->testcase

2. To identify a
   1. Passed test
   2. Skipped tests
   3. Cancelled
   4. Expected Failed
            NO action for the above 4
   5. Failed - Anything that helps to identify type of failure
   6. Error - printer did not return value itself - on reply body has the type of error

   From <https://jira.zebra.com/secure/RapidBoard.jspa?rapidView=5459 &projectKey=ATSRND&view=planning&selectedIssue=ATSRND-108&issueLimit=100#>

   To download logs go to build page(firmwareweb/allepoch.php -> the test ->HTML report and download the .log file

   To run ATF test and get the logs
- Downloads/evtstuff/test_py_env\scripts
- Atf.exe
   Run - atf -d <conf_file_name> <test_suite>
   Example - atf -d ZQ620plus appl --log-level RAW
   Use --log-level RAW for detailed logs
